

*Dear Parents and Carers,*

*We are thrilled to share that our school will soon be implementing new systems from Lightspeed Systems to enhance our internet safety measures: Lightspeed Filter and Lightspeed Alert. Lightspeed Systems is a renowned provider of online safety solutions, trusted by schools globally to protect students in their digital learning environments.*

*Lightspeed Filter is an advanced internet filtering solution that blocks inappropriate content, ensuring that our children can explore the internet safely and productively. It works quietly in the background, providing a seamless online experience for our students.*

*Lightspeed Alert is a proactive monitoring tool that detects potential safety risks by monitoring online activity for signs of cyberbullying, self-harm, and other concerning behaviours. Using advanced AI, it sends real-time alerts to school staff, allowing us to intervene promptly and support our students effectively.*

*Student safety is our top priority. These new tools will significantly enhance our ability to protect our children from online threats, creating a safer digital environment for everyone. We know that privacy is a critical concern for many parents, and we want to reassure you that both Lightspeed Filter and Lightspeed Alert are designed with strong privacy protections to keep student data secure and used appropriately.*

*The transition to these new systems will be completed by 1st October 2024, and we are committed to ensuring a smooth implementation with minimal disruption to students' daily routines.*

*We believe these systems will greatly benefit our school community by providing enhanced protection and support for our students. If you have any questions or concerns, please feel free to contact us.*

*Thank you for your continued support and partnership in keeping our children safe online.*

Kind regards

Mrs Sophie Dines  
Principal
